Chat Systems

I HAVE A HARD TIME KEEPING TRACK OF WHICH CONTACTS USE WHICH CHAT SYSTEMS.

XMPP

Caratteristiche importanti: mobile

Caratteristiche importanti: desktop

The image displays two overlapping windows from a desktop environment. The top window is a Jabber chat client window titled "jabber@conference.". The chat history shows a conversation where "valhalla" repeatedly says "ok, cleaning up the backlog" and "valholl" says "Showing the important things: KITTENS!". A black and white image of a cat is shown. Below the image, "valholl" shares a link to a Wikimedia Commons file: "https://commons.wikimedia.org/wiki/File:Ciao_Stanislaus.jpg (CC-BY-SA4.0)". "valhalla" responds with three thumbs down and a red heart emoji. The bottom window is a terminal window showing the same chat logs in a text-based format. At the bottom of the terminal, there is a command prompt "0\$*" and a status bar "1-\$ irc" and "Thu 2017-10-26 22:00".

jabber@conference.
